

Mechanical Engineering Scheduling Plan

The majority of required mechanical engineering courses are offered every semester. However, in order to make efficient use of resources, a few courses, selected to have minimal impact on student progress, are offered only once a year. A list of courses planned to be offered once a year includes:

fall only	spring only
ME 303	ME 304
ME 331	ME 333
	ME 301

Please be aware that the engineering department strives to give students the maximum flexibility to complete the degree requirements in a timely manner. If you have any questions or concerns as to how the above once-a-year offerings will affect your progress, please consult with your advisor.

In order to help students with planning, the following technical elective and graduate course schedule is proposed.

Semester	Technical Elective	
	Undergraduate	Graduate
Fall 09	ME 424, ME 471, ECE 387	ME 563, SE 510
Spring 10	ME 421, CS 384	CE 570, ME 562, SE 520
Fall 10	ME 471, ME 480, ECE 387	ME 505, SE 510
Spring 11	ME 421, ME 454, CS 384	ME 509, SE 520
Fall 11	ME 424, ME 480, ECE 387	ME 562, SE 510
Spring 12	ME 421, ME 454, CS 384	CE 570, SE 520

Note that this is a tentative list. Additional technical elective courses may be offered by other departments. Moreover, in the future, as demand increases, the department hopes to be able to offer additional elective courses at both the undergraduate and graduate levels.
